USER GUIDE · MMH CRM v31.4

Monthly report

Thailand Surgical team · plan, result, save and send

Write the **PLAN** and **RESULT** of each task group in **Monthly tasks**, save it to the Google Sheet, then send the monthly report e-mail with the PDF attached, all from the CRM.

Monthly tasks | Save to Sheet | Send report | Team leader

Open the app: MMH CRM

Product Team · MANI Medical Hanoi · 10/2026

OVERVIEW

How the monthly report works

One item = one task group (Type task) of one person in one month

1 Plan

Early in the month, write the **PLAN** for each task group: Turnover, Distributor, Hospital, University, Event…

→

2 Result

At the end of the month, write the **RESULT** of each item: figures, customers, events, issues.

→

3 Save to Sheet

Each save goes straight to sheet 5. MONTHLY REPORT of the Thailand Surgical CRM file. A message confirms the row.

→

4 Send report

Send report ▸ Monthly report: e-mail + PDF with the **results of this month** and the **plan of next month**.

Who sees what. Each sales rep sees and edits their own items. The team leader (Dao) sees every PIC of the team and can send for the whole team.

Reload the app first. The bottom-left corner must show **MMH CRM v31.4** or newer: since v31.4, text entered with **Speak** (voice) is always saved, and the app asks before closing an item with unsaved text.

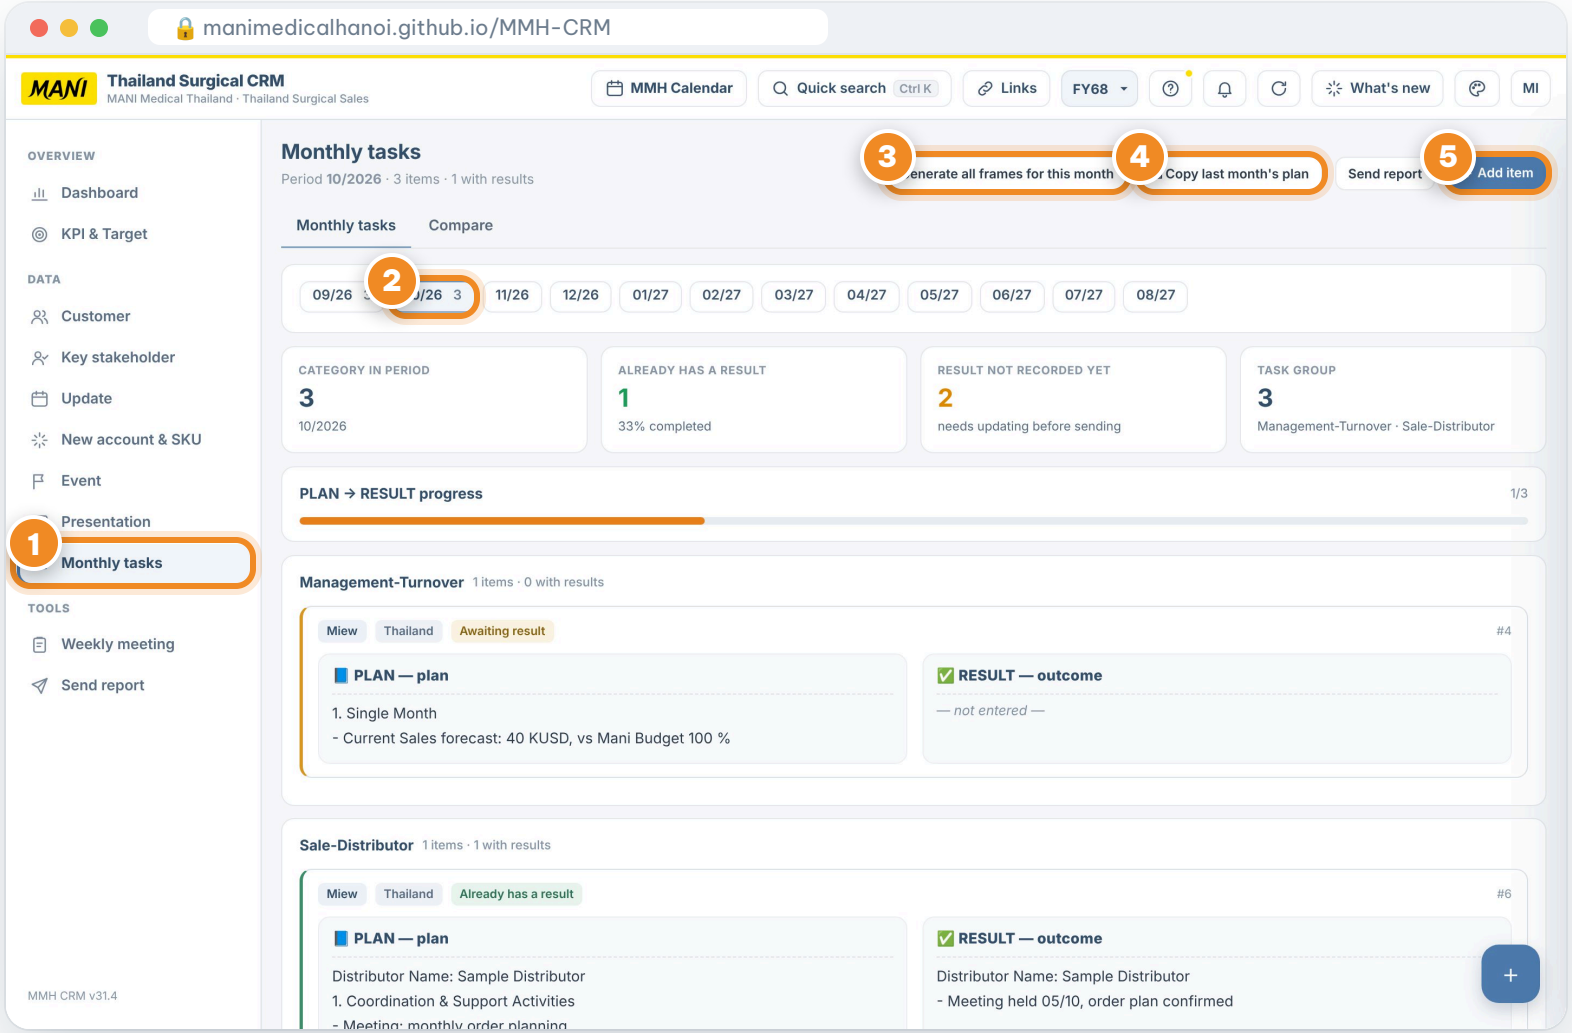

STEP 1

Open Monthly tasks

Left menu ▸ Monthly tasks

1. Click **Monthly tasks** in the left menu.
2. Pick the **month**. The number on each chip = items already created.
3. **Generate all frames for this month**: creates one item per task group with a ready-made frame. Click it again any time: it never creates duplicates.
4. **Copy last month's plan**: copies last month's items and PLAN text into this month (RESULT left empty).
5. **+ Add item**: add a single task group.

> The cards show **Awaiting result** (yellow) or **Already has a result** (green). The bar shows how many items already have a RESULT.

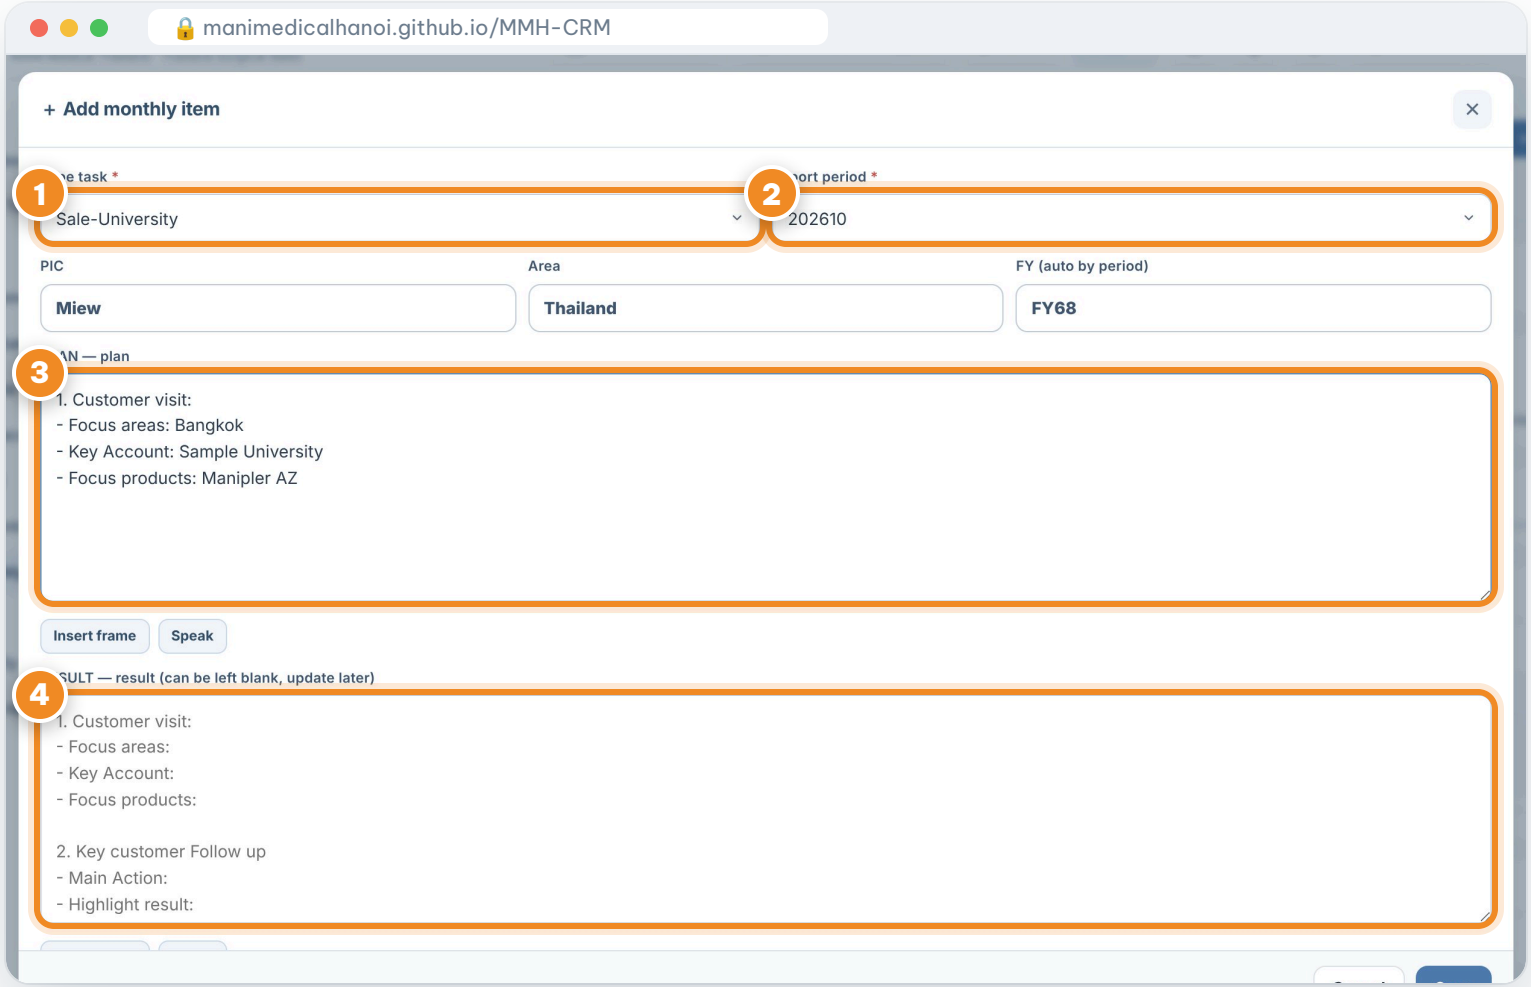

STEP 2

Add an item

+ Add item ▸ fill in ▸ Save

1. **Type task**: the task group (e.g. Sale-University). The frame for that group appears as grey hints.
2. **Report period**: the month (YYYYMM). PIC, Area and FY fill in automatically.
3. **PLAN**: what you plan to do this month. **Insert frame** pastes the template; **Speak** lets you dictate.
4. **RESULT**: can be left empty now and filled at the end of the month.

> Click **Save**: the item is written to the sheet at once.

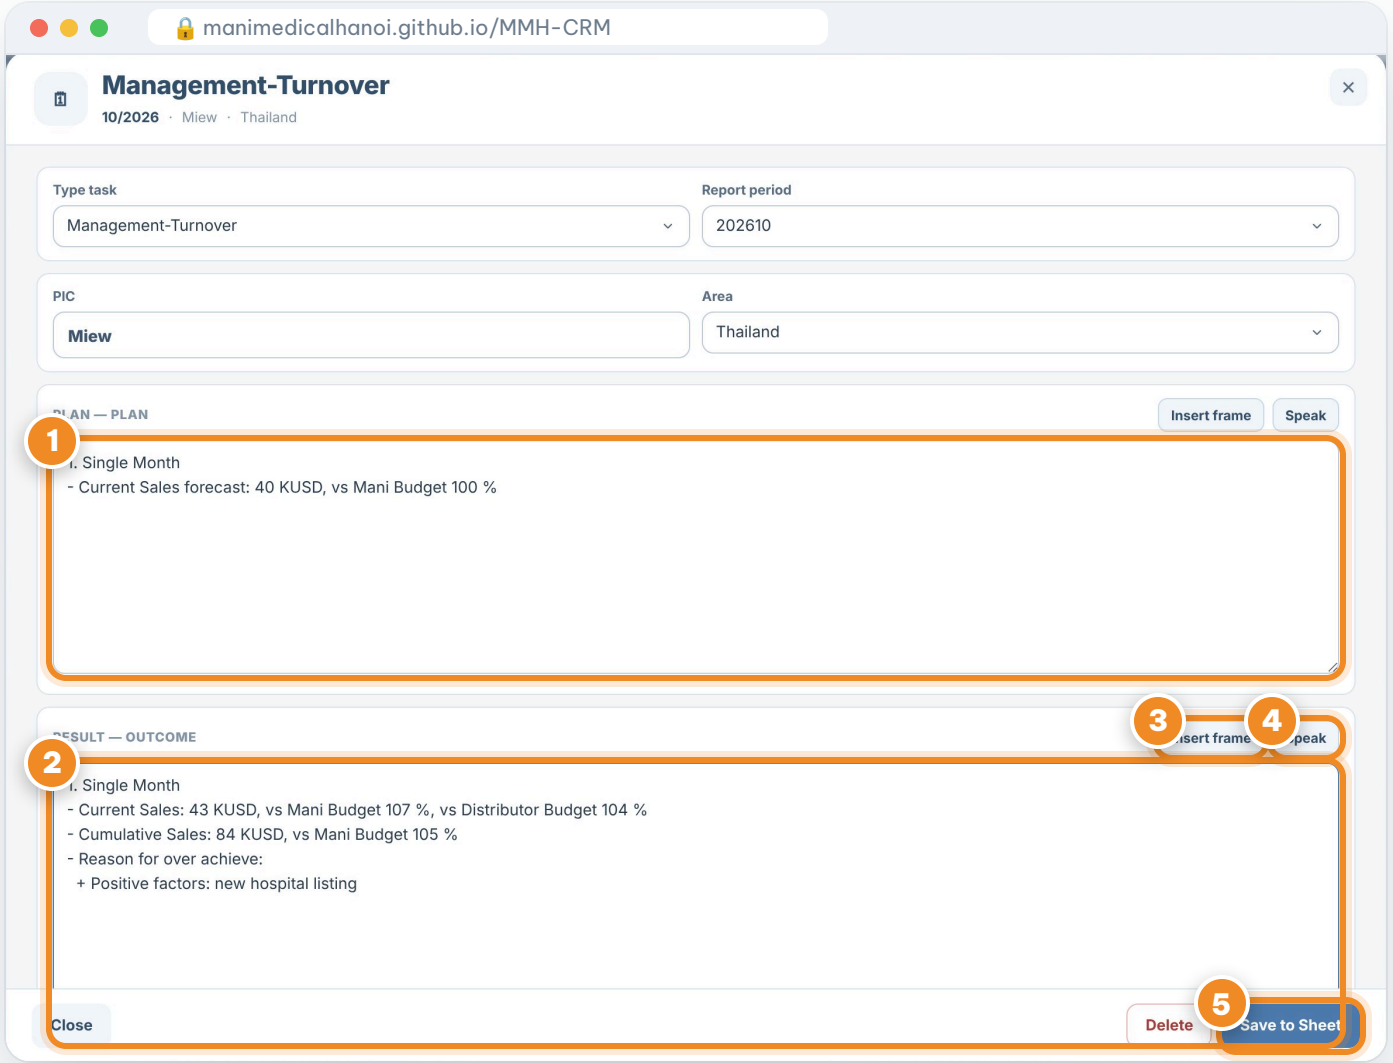

STEP 3

Write the PLAN and RESULT of an item

Click any card ▸ the item opens on the right

1. **PLAN**: edit the plan of the month.
2. **RESULT**: write what was achieved: sales vs budget, customers, events, next actions.
3. **Insert frame**: pastes the standard frame of this task group (your text is kept below it).
4. **Speak**: dictate in English; click again to stop. The text is saved like typed text.
5. **Save to Sheet**: sends every box you changed.

STEP 4

Check that it is saved

A message confirms the sheet and the row

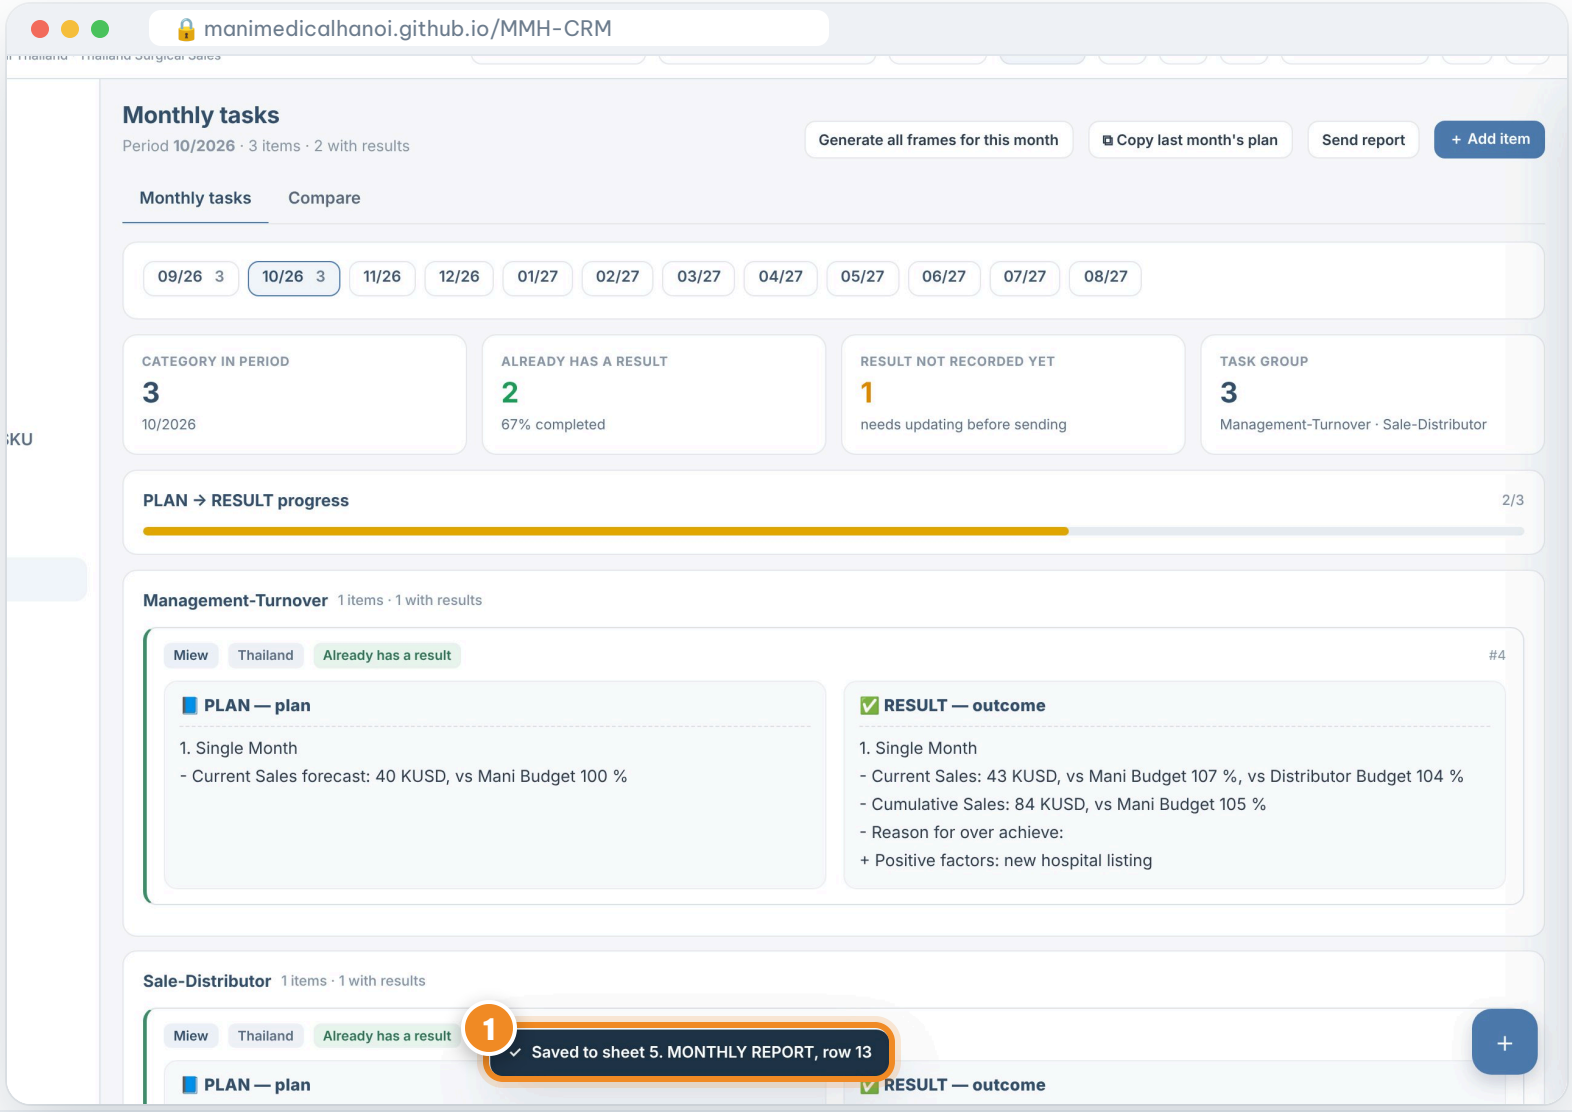

1. After **Save to Sheet**, the message **Saved to sheet 5. MONTHLY REPORT, row …** appears at the bottom.

! **Closing with unsaved text** (×, Esc or Close): the app asks first. **OK** = save to the sheet · **Cancel** = discard.

! Pressing **Save** twice sends the item only once. Wait for the message.

! If the network is slow you will see **Sent (slow network)**: open the item again after a few minutes to check.

> All items are stored in sheet 5. MONTHLY REPORT (columns Type task · PIC · Area · FY · Report period · PLAN · RESULT).

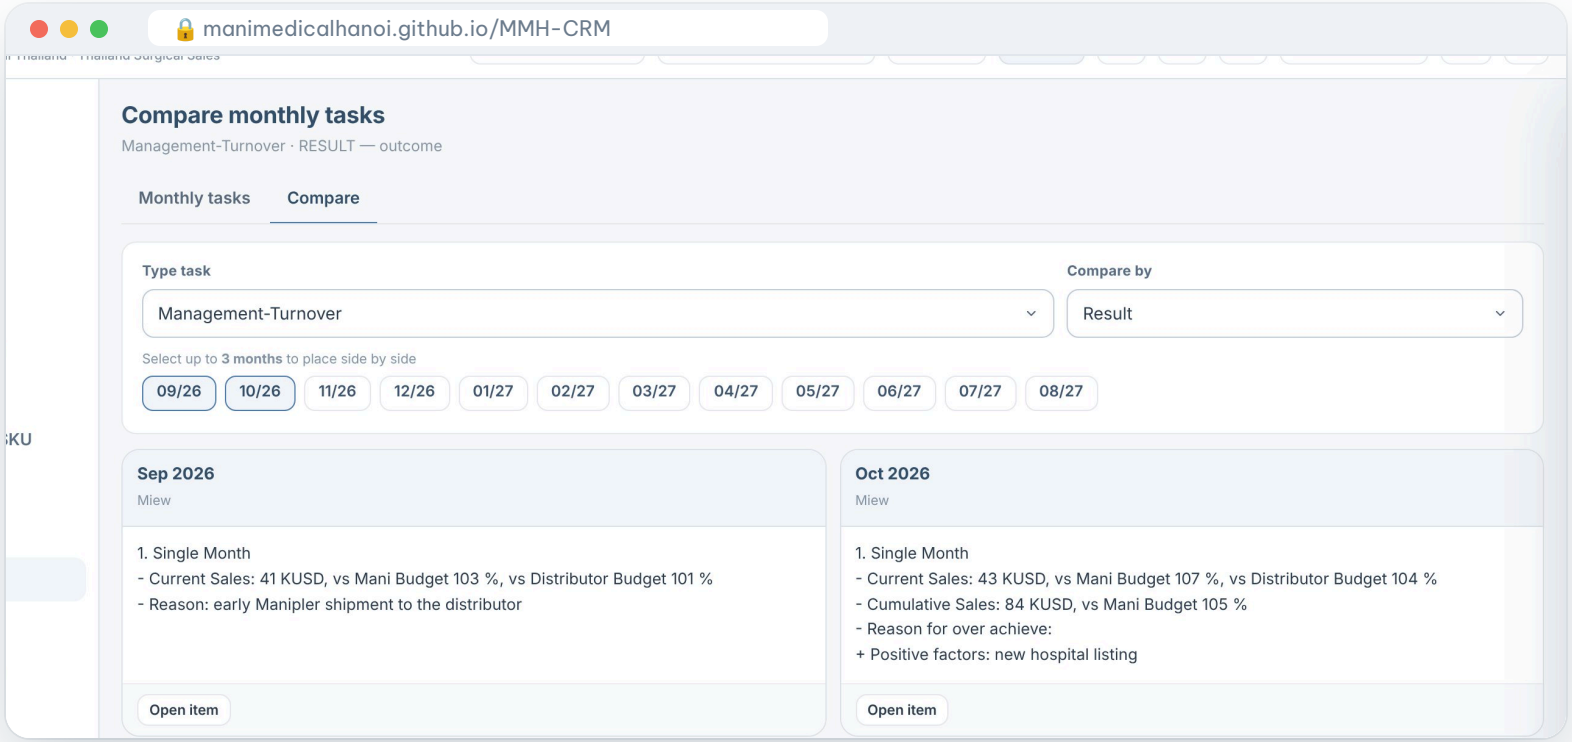

STEP 5 · OPTIONAL

Compare months

Monthly tasks ▸ Compare

1. Choose a **Type task** (e.g. Management-Turnover).
2. **Compare by**: Result or Plan.
3. Select up to **3 months** to see them side by side, e.g. this month vs last month.
4. **Open item** under a month to edit it directly.

> Handy before writing the RESULT: see what you planned and what you reported last month.

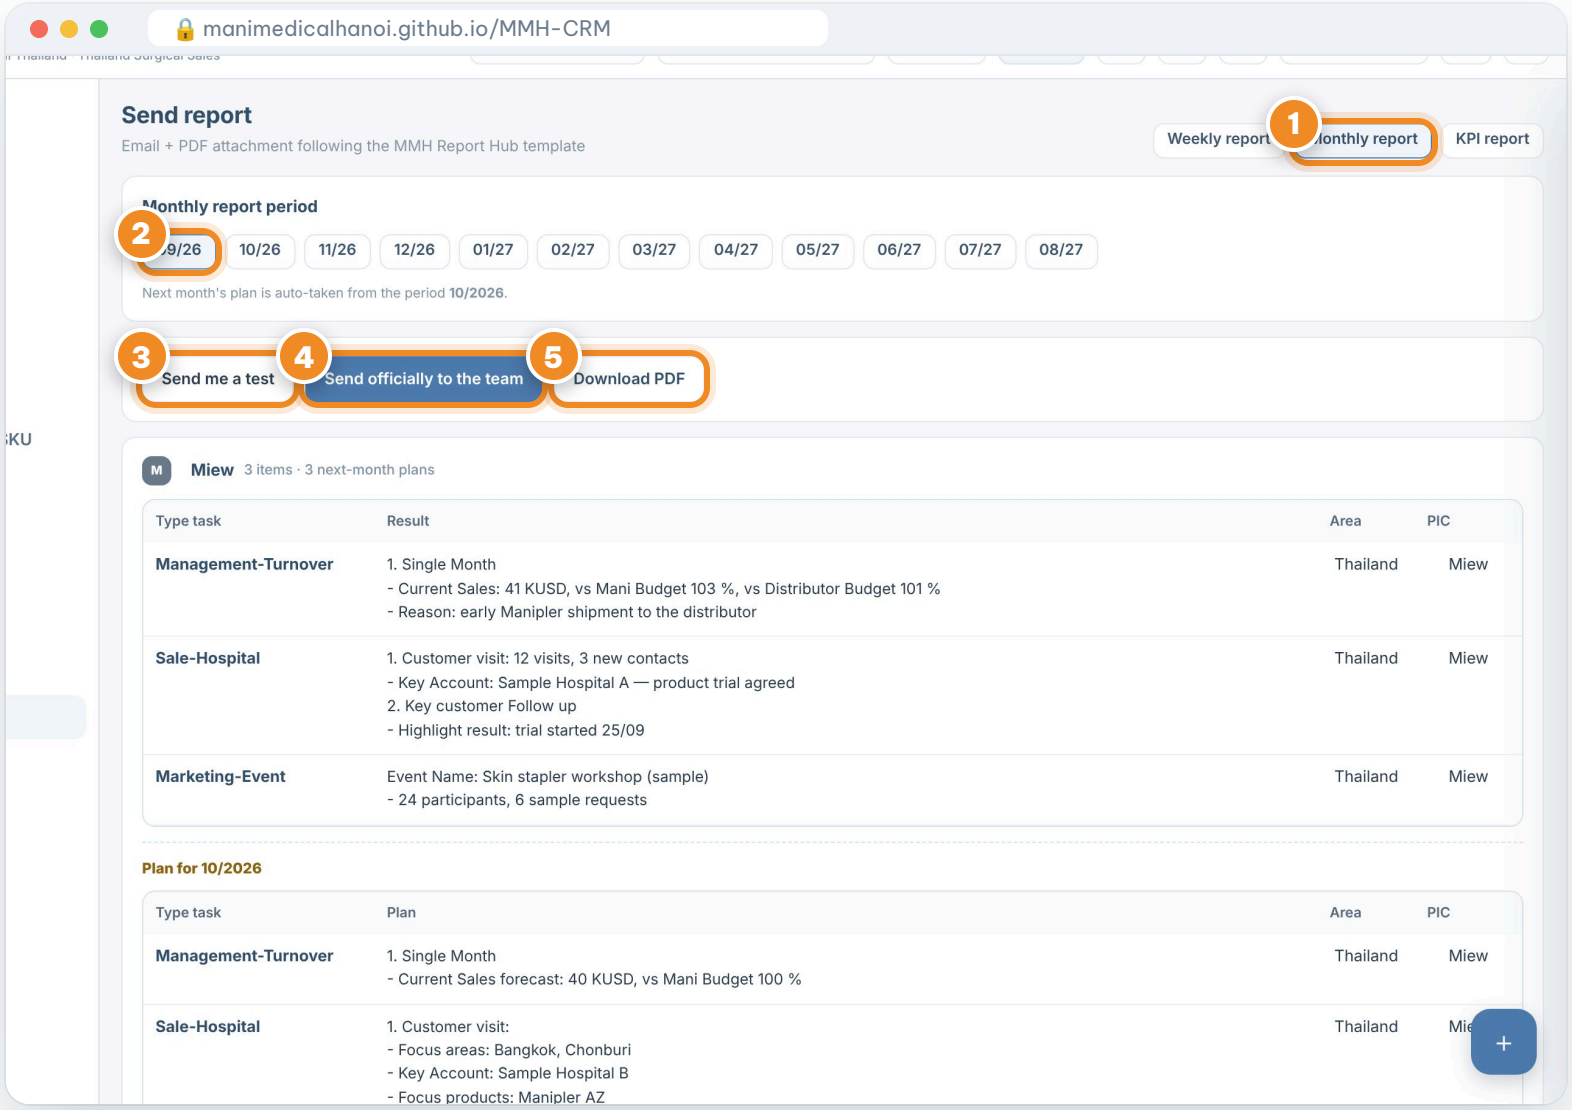

STEP 6

Send the monthly report

Left menu ▸ Send report ▸ Monthly report

1. Click **Monthly report** at the top right.
2. Pick the **month** you report on. The plan of the next month is added automatically.
3. **Send me a test**: the e-mail comes only to you, to check it.
4. **Send officially to the team**: e-mail to the Director, CC Dao and the back office, with the PDF attached.
5. **Download PDF**: the file only, no e-mail.

> The preview below the buttons is exactly what the e-mail contains: **RESULT** of the month + **PLAN** of next month. An empty RESULT shows the PLAN text instead, so fill the RESULT before sending.

For the team leader (Dao)

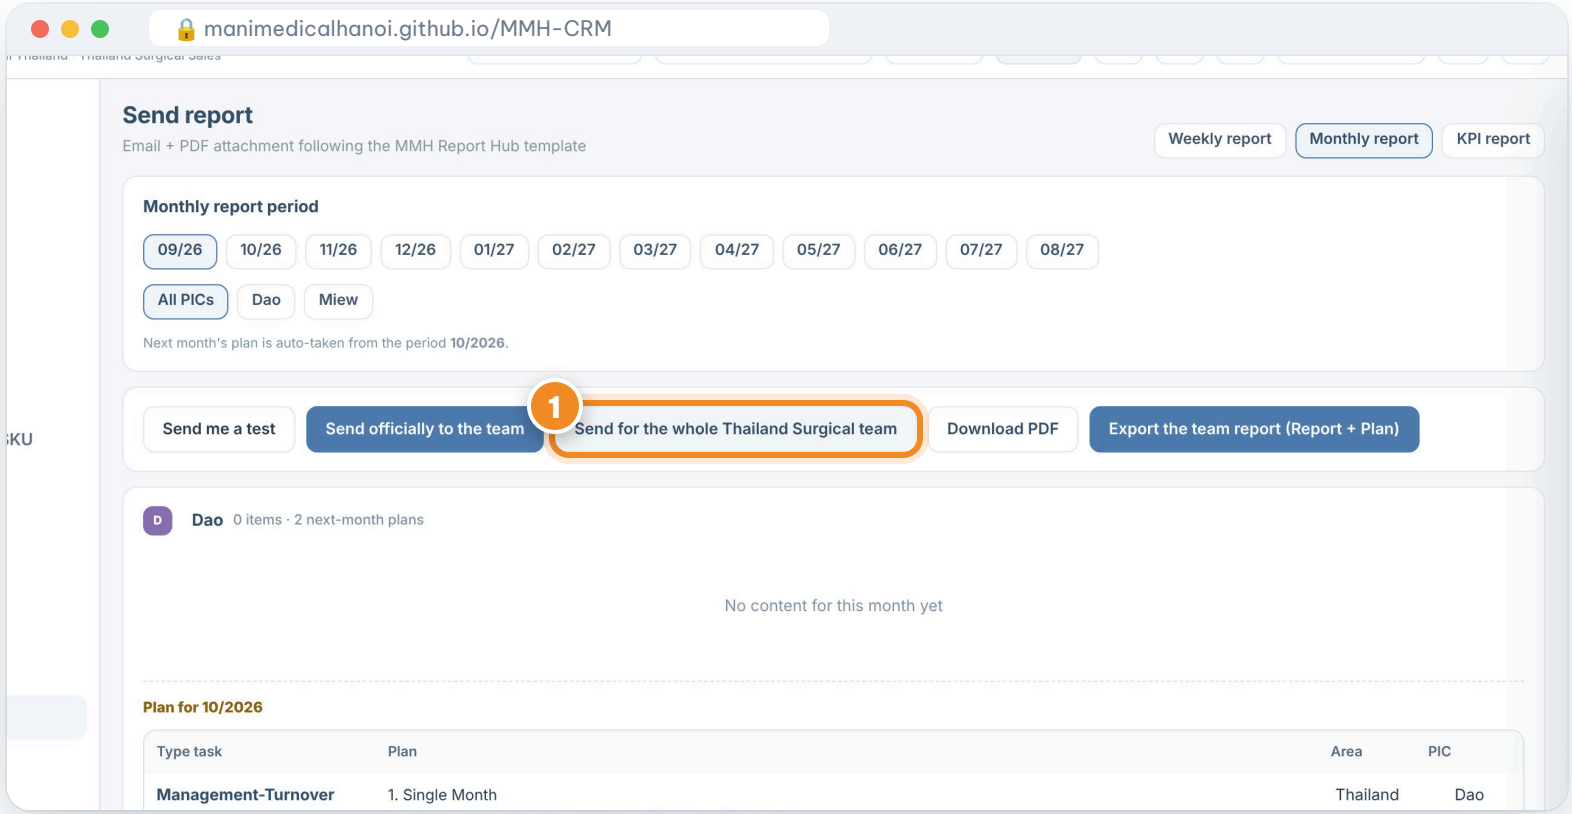

Same pages, with every PIC of the team

Monthly tasks: choose **All PICs** or one person (Dao, Miew). You can open and correct any item of the team.

Generate all frames creates the items for the PIC selected.

Send report ▸ Monthly report: **Send for the whole Thailand Surgical team** sends one e-mail per person.

Export the team report (Report + Plan): 2 PDF files for the whole team: the report of the month and the plan of next month. No e-mail is sent.

Questions and good practice

? I filled the report but the sheet is empty?

Reload the app (v31.4 or newer) and enter the text again. Older versions did not send text entered with **Speak**, and closing an item without saving lost the text.

? Where is my data stored?

In sheet 5. MONTHLY REPORT of the Thailand Surgical CRM file. One row = one item. The old "Surgical Action" file is not used by the app.

? Plan or Result?

PLAN = what you will do this month. RESULT = what was achieved. Do not write results into the PLAN box: the report would show them as next month's plan.

? Can I edit after sending?

Yes. Open the item, change it, Save to Sheet, then send again if needed.

? Can I delete an item?

Open the item ▸ **Delete**. Only your own items (the team leader can delete any item of the team).

? Need help?

Click **?** on the top bar for step-by-step guides, or contact the Product Team (Giang).
